

**ADDENDUM E**

***In the event that certain of our competitors integrate products performing functions similar to our products into their existing network infrastructure offerings, our existing and potential customers may decide against using our products in their networks, which would harm our business.***

Other providers of network-based hardware and software products are offering or announcing functionality aimed at solving similar problems addressed by our products. For example, several vendors have recently announced their intention to develop a switched broadcast product application. The inclusion of, or the announcement of the intent to include, functionality perceived to be similar to our product offerings in our competitors' products that have been accepted as necessary components of network architecture may have an adverse effect on our ability to market and sell our products. Furthermore, even if the functionality offered by other network infrastructure providers is more limited than our products, a significant number of customers may elect to accept such limited functionality in lieu of adding components from a different vendor. Many of our existing and potential customers have invested substantial personnel and financial resources to design and operate their networks and have mature relationships with other providers of network infrastructure products, which may make them reluctant to add new components to their networks, particularly from new vendors. In addition, our customers' other vendors with a broader product offering may be able to offer pricing or other concessions that we are not able to match because we currently offer a more modest suite of products and have fewer resources. If our existing or potential customers are reluctant to add network infrastructure from new vendors or otherwise decide to work with their existing vendors, our business, operating results and financial condition will be adversely affected.
